+ REQUESTED INFO

SENIOR SOFTWARE ANALYST
Last Dawn Salary: S$4300

• Developed Excel macros to automate data import from Excel files into Oracle 9i, improving data entry efficiency and consistency

• Implemented search functionality in ASP.NET 3.5 web pages using input parameters to retrieve and display relevant material resource planning data

• Integrated the ASP.NET front-end with the Oracle 9i backend to support material resource planning workflows and data queries

Reason of leaving: *End of (2) months contract*

- Keppel Land Limited — OCT 2015- FEB 2016

WEB APPLICATION DEVELOPER, INTERN
Last Dawn Salary: S$800

• Led a development team through the full SDLC for a Mall Information Management System using ASP.NET 3.5, Telerik controls, MS SQL 2012 and TFS

• Designed and implemented modules for master data setup, mall/property information entry, retailers and key tenant management to support new mall development and asset enhancement initiatives

• Developed fixed-format reporting, ad hoc reporting and data export features to provide users with flexible access to mall and property information

• Collaborated with stakeholders to clarify requirements, translate business needs into technical specifications and ensure the system supported planning and decision-making for malls and properties

• Oversaw code integration, version control and deployment activities using TFS to maintain code quality and team coordination

Reason of leaving: *End of five months internship*

- ACSOLV CONSULT, Singapore. — FEB 2012- SEP 2012

ADVANCED SOFTWARE ENGINEER
Last Dawn Salary: S$2200

• Built customized software applications integrated with Sage ACCPAC ERP using VB.Net 2010, MS SQL 2008, Pervasive, MySQL, VB 6.0 and Crystal Reports 11.0 to support finance and operations

• Developed programs to post sales and purchase invoices from Excel into the accounting system via API, improving data integration and reducing manual processing

• Produced tailored Crystal Reports to address specific accounting and management reporting requirements within the Sage ACCPAC ERP environment

• Enhanced the Inventory Module using VB.Net 2005, MS SQL 2005, VB 6.0 and Crystal Reports 8.5 by developing customized inventory and stock reports aligned with business needs

Reason of leaving: *End of (8) months contract*

- Shaw Services Pte Ltd, Singapore. — JUN 2011- DEC 2011

APPLICATION DEVELOPER
Last Dawn Salary: S$1800

Expectation Salary:
S$ 4800

Availability:
Immediately

Interview Availability:
Currently based in Myanmar. Available for online interviews (video/phone) via [Microsoft Teams/Zoom/Google Meet]

• Implemented Shaw Portal using ASP.NET 2.0 and MS SQL Server 2005 to manage data structures, business rules and user access across related systems, including Movie Scheduling and Ticketing

• Programmed Shaw Scheduling System in VB.NET 2005 with MS SQL Server 2005 to support movie scheduling, including show times, theaters and dates

• Developed Shaw Ticketing System in VB.NET 2005 with MS SQL Server 2005 to handle advance ticket booking, ticket sales, invoicing and booking reports with sales summaries

Reason of leaving: *End of (5) months contract*

- E-Motive Display, Singapore. OCT 2010- APR 2011

SOFTWARE ENGINEER
Last Dawn Salary: S$2300

• Developed Angel LCD Displays Configuration Software using C#.NET 2008 to generate XML configuration files from Windows Forms input for elevator LCD displays

• Implemented data capture and mapping from Windows Forms controls into structured XML formats for reliable configuration management

• Built functionality to transmit generated XML configuration files to the server, supporting remote deployment and updates of elevator LCD display settings

Reason of leaving: *End of (6) months contract*

- Web Master Consultancy, Singapore JAN 2009- SEP 2010

ANALYST PROGRAMMER
Last Dawn Salary: S$1800

• Led end-to-end development of an Online Advertisement Dashboard module in SugarCRM using PHP and MySQL, implementing full SDLC to display daily car sold quantity and pre-sale quantity by salesperson, broker and vehicle brand, with frequent dashboard data refresh

• Led end-to-end development of a Technical Request Email Online module in SugarCRM using PHP and MySQL, covering full SDLC to enable CRM users to submit IT-related device issues directly to the IT department

• Led end-to-end development of a Log Card ROC module in SugarCRM using PHP and MySQL, covering full SDLC to allow users to upload, copy, remove and manage Log Card and ROC PDF files with detailed information

• Developed the www.thinkone.com.sg CMS and two versions of the public website in PHP with DB2, extracting detailed vehicle information from DB2 and implementing search and paging functionality

• Led full SDLC development of an Insurance Renewal System in PHP with DB2 to create renewal records for quoted vehicles and capture detailed call information and status updates from brokers and salesmen

• Led full SDLC development of an Insurance Quotation System in PHP with DB2 to enable authenticated users to create, edit and search vehicle quotations

Reason of leaving: *To seek a more challenging role or project*

- Alpha Info-Tech Pte Ltd, Myanmar. MAY 2003- SEP 2008

PROGRAMMER
Last Dawn Salary: MMK 100,000

• Developed a Library Management Software in C#.Net 3.5 with MS SQL 2008, implementing modules for login, books, students, authors, publication information, book availability search, student borrowing status, and general reporting

• Built NCRC Presentation CD-ROM in VB 6.0 with an MP3 player that synchronized audio playback with automatic slide image changes and allowed users to select presentations by title and day

• Developed Surgeons Conference Presentation CD-ROM in VB 6.0 with an MP3 player integrated with automatic slide transitions and day-based presentation selection

• Created a Font Converter and Editor in VB 6.0 to load Word files into a text editor, convert TrueType fonts to Unicode fonts and save the output as a new file

• Implemented a Membership Management Information System in VB 6.0 with MS Access to perform CRUD operations for membership records and support search and reporting

• Developed Alpha Service Performance Information System in VB 6.0 with MS Access to maintain IT service department employee performance, customer information and service income records

• Produced multiple Multimedia DVD and CD-ROM applications (No.1–20) in VB 6.0 with an MP3 player interface that allowed users to view MP3 filenames via a calendar image and select items for playback

• Built the 5th Concial Tipitaka Parli Canon (DVD-ROM) using VB 6.0 and C#.Net 2.0, loading texts and images into an image viewer via a hierarchical structure or map, and displaying detailed canon summaries on a map interface

• Developed a Stock Inventory Management System in C#.Net 3.5 with MS SQL, LINQ and Krypton to manage products, categories, suppliers, purchases, sales, stock summaries and system user information

• Created a Point-of-Sale System in C#.Net 2.0 with MS SQL to manage products, categories, customers, orders, invoices and user information

• Implemented Stock Control Systems in ASP.NET 1.0/2.0 with MS SQL 2000/2005 to manage stock issue and receipt, inventory, stock locations, sales, purchase records and user access

• Built Alpha Phone Exchange System in VB 6.0 with MS Access to capture data from PABX exchange via serial communication, storing in/out calls, phone numbers, durations and extensions, and generating call history reports

• Developed Alpha Truck Weighting System in VB 6.0 with MS Access to receive data from digital scales, store truck and cargo weights, manage customer files and generate invoices and reports

• Created Alpha Precious Scaling System in VB 6.0 with MS Access to receive data from digital scales, print receipts and invoices with weight and product information, and manage customers, products, user information and unit conversion

Reason of leaving: *To change my career life in International*
